Accommodation

PlaceMap

Using the power of **Google Earth** to store and display all of your spatial data in a much more dynamic way

Google Earth is a free software program that lets you fly anywhere on Earth to view satellite imagery, maps, terrain and 3D buildings.

When used in conjunction with **PlaceMap**, it becomes a very powerful 3D tool that can be used for storing, querying, displaying, printing and distributing all of your spatial data.

For industries such as Real Estate, the Accommodation sector and the Travel industry, **PlaceMap** offers many advantages over the existing map display tools including:

- ✓ Use the power of **Google Earth** for “flying” over your locations... in 2D or 3D
- ✓ View buildings and terrain in 3D to see how they relate to other places and look at potential location views
- ✓ Create KML/KMZ files of multiple places and tracks which can be emailed to interested parties. KML/KMZ files can be opened directly from the email on computer and smart phones and will automatically zoom into the places of interest
- ✓ Use the tools available in **Google Earth** such as the distance measurement tool and digitizing functions
- ✓ Use the existing layers in **Google Earth** primary database for viewing location photos, restaurants, bars, schools, bus stops and much more
- ✓ View property location floor plans in the correct size and orientation
- ✓ Overlay tourist maps highlighting activities close to the property
- ✓ Link directly to the property Agents, Hotel or Travel website advert
- ✓ Save high quality images and movies for printing or emailing to clients
- ✓ Add your own place marks to highlight property locations such as tourist attractions, transport, sporting facilities etc.
- ✓ Add photographs and place them in the correct position and view eg. from drones
- ✓ Store multiple property KML's on your smart phone for easy reference

Google Earth

In the past, **Google Earth** has been available in a free and a professional version which cost \$400 a year. However, since January, 2015, the Professional version has been available for free so this adds significant features to the **PlaceMap** system including:

- **Advanced Measurements:** Measure parking lots and land developments with polygon area measure, or determine affected radius with circle measure.
- **High-resolution printing:** Print Images up to 4800 x 3200 pixel resolution.
- **Exclusive Pro data layers:** Demographics, parcels, and traffic count.
- **Spreadsheet Import:** Import up to 2500 addresses at a time, assigning place marks and style templates in bulk.
- **GIS import:** Visualize ESRI shapefiles (.shp) and MapInfo (.tab) files.
- **Movie-Maker:** Export Windows Media and Quicktime HD movies, up to 1920 x 1080 resolution.

Over the past few years, Google has released complete 3D representations of buildings and terrain throughout many metropolitan areas. 3D imagery provides an immersive experience as you explore, just like the view you'd have if you were flying over the city.

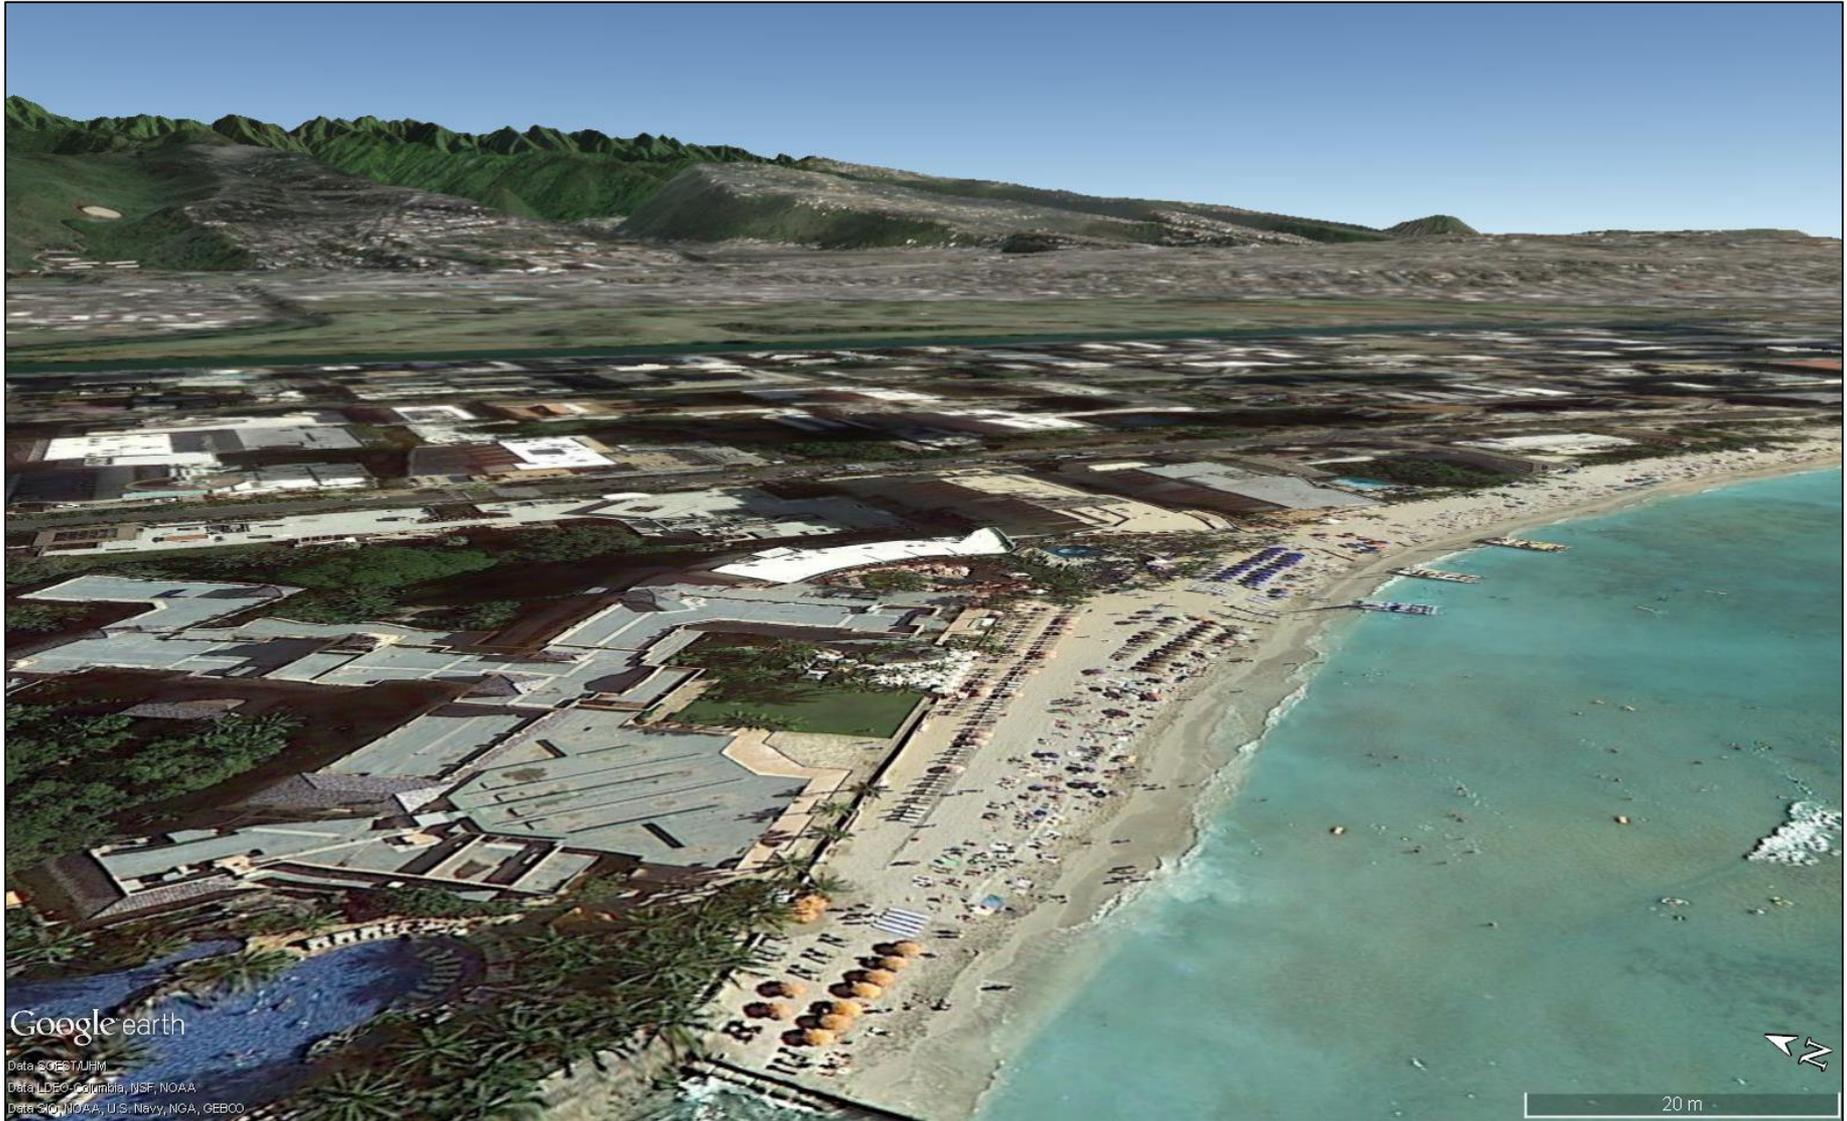

Google Earth London 3D buildings

In other cities, the original Sketchup 3D models are still available such as along the Waikiki beach strip in Hawaii where you can get a great view of the hotels

To illustrate the effect of the 3D buildings, here is a view of Waikiki Beach with topography turned on but 3D buildings turned off

Here is the same view of Waikiki Beach with topography turned on and 3D buildings turned on

PlaceMap consists of an online database containing all of the property and accommodation listings. The database can store millions of listings which can be queried to select a group of listings for viewing in **Google Earth**.

The screenshot shows the PlaceMap web interface. At the top, there are tabs for 'Places' and 'Map'. Below the tabs are several green buttons: 'Upload Images', 'Edit Places', 'Transfer Places', 'Copy a Place', 'Add a Place', 'Edit Groups', and 'Edit User'. Below these buttons are five dropdown menus for filtering: 'Select a place name', 'Select a place collection', 'Select a place category', 'Select a place type', and 'Select a user group'. Below the dropdowns are four blue buttons: 'Select All', 'Select by Query', 'Clear All', and 'Select by Group'. Below the buttons is a table with 9 columns: 'No', 'Place Name', 'Place Collection', 'Place Category', 'Place Type', 'Date Entered', 'Delete', 'Edit', and 'Remove'. The table contains 5 rows of data. Below the table is a green button labeled 'Create KML'. There are two callout boxes: one pointing to the 'Selected listings' text and another pointing to the dropdown menus with the text 'Criteria to select a set of listings'.

Place Description:	We are an independent Boutique hotel located on Robson Street downtown Vancouver. All guest rooms are corner rooms with balconies. Some of the amenities include WiFi, bath robes, docking stations, in-room safes, 2 telephones, pay per-view movies and much more. Our Aquatic centre has an indoor heated pool, jacuzzi, sauna, treadmill, elliptical trainer and bicycle. Our ABODE lobby restaurant is open every day and serves fresh local cuisine. The hotel is eco-friendly and rated 4 stars out of 5. Our friendly staff assure you of a warm and comfortable stay.

Latitude & longitude's are automatically generated from the property address

Once the listings have been selected, Click the Open in **Create KMZ** button to generate the kmz file and then click the **Download** button to save the kmz file to your computer.

The screenshot shows the PlaceMap interface with a list of places and various control buttons. The 'Create KML' button is highlighted with a callout box that says 'Click the Create KMZ button to create the kmz file'. The 'Download' button is also highlighted with a callout box that says 'Click the Download button to open the KMZ file in Google Earth'.

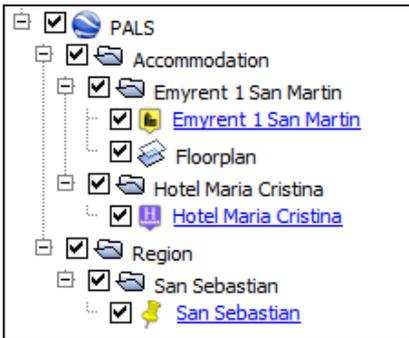

No	Place Name	Place Collection	Place Category	Place Type	Date Entered	Delete	Edit	Remove

Hotel Maria Cristina

Experience The Luxury Collection by Starwood in the heart of San Sebastián

This 5-star hotel is located opposite San Sebastians Victoria Eugenia Theatre, with views over the Cantabrian Sea and Urumea River. Dating from 1912, it is decorated in classic Belle Époque style with original columns, brocades and chandeliers.

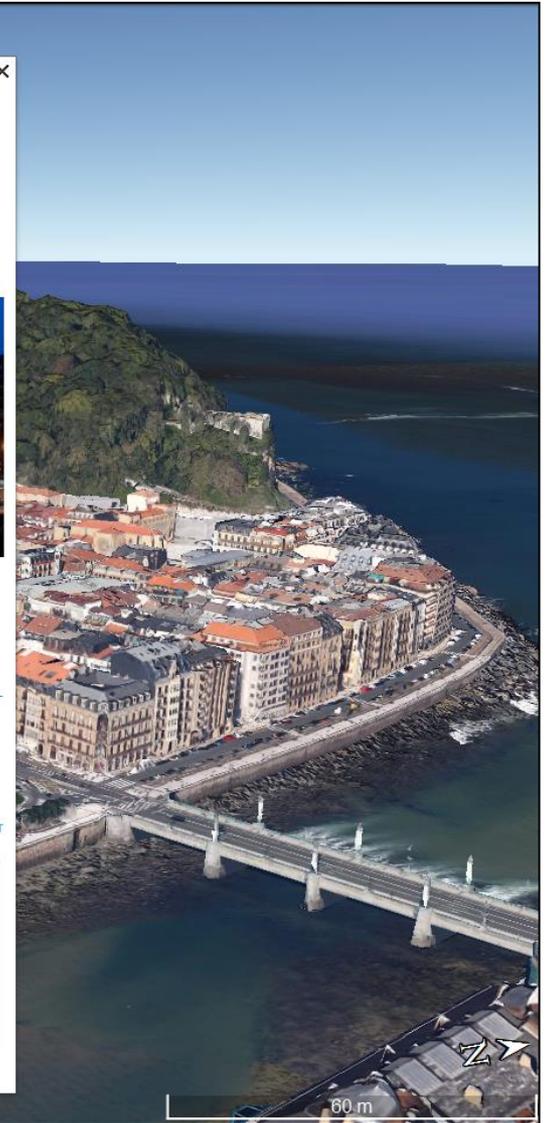

Decorated in grey tones, the elegant rooms at the María Cristina Hotel have free Wi-Fi, a flat-screen satellite TV, dark wood furniture and air conditioning. The marble bathroom comes with a separate bath and rain-effect shower, double sink, bathrobe and slippers. They include 200-thread-count bed linens and feather duvets.

Guests can enjoy views over the hotel gardens and the River Urumea from the María Cristina. The Kursaal Convention Centre is around 300 metres away.

The Easo Restaurant serves a daily buffet breakfast. The DRY Martini Bar serves local pintxos tapas dishes and a range of drinks.

N

You can use some of the **Google Earth** tools such as the Ruler to measure distances.

You can easily add your own place mark and save this for future use

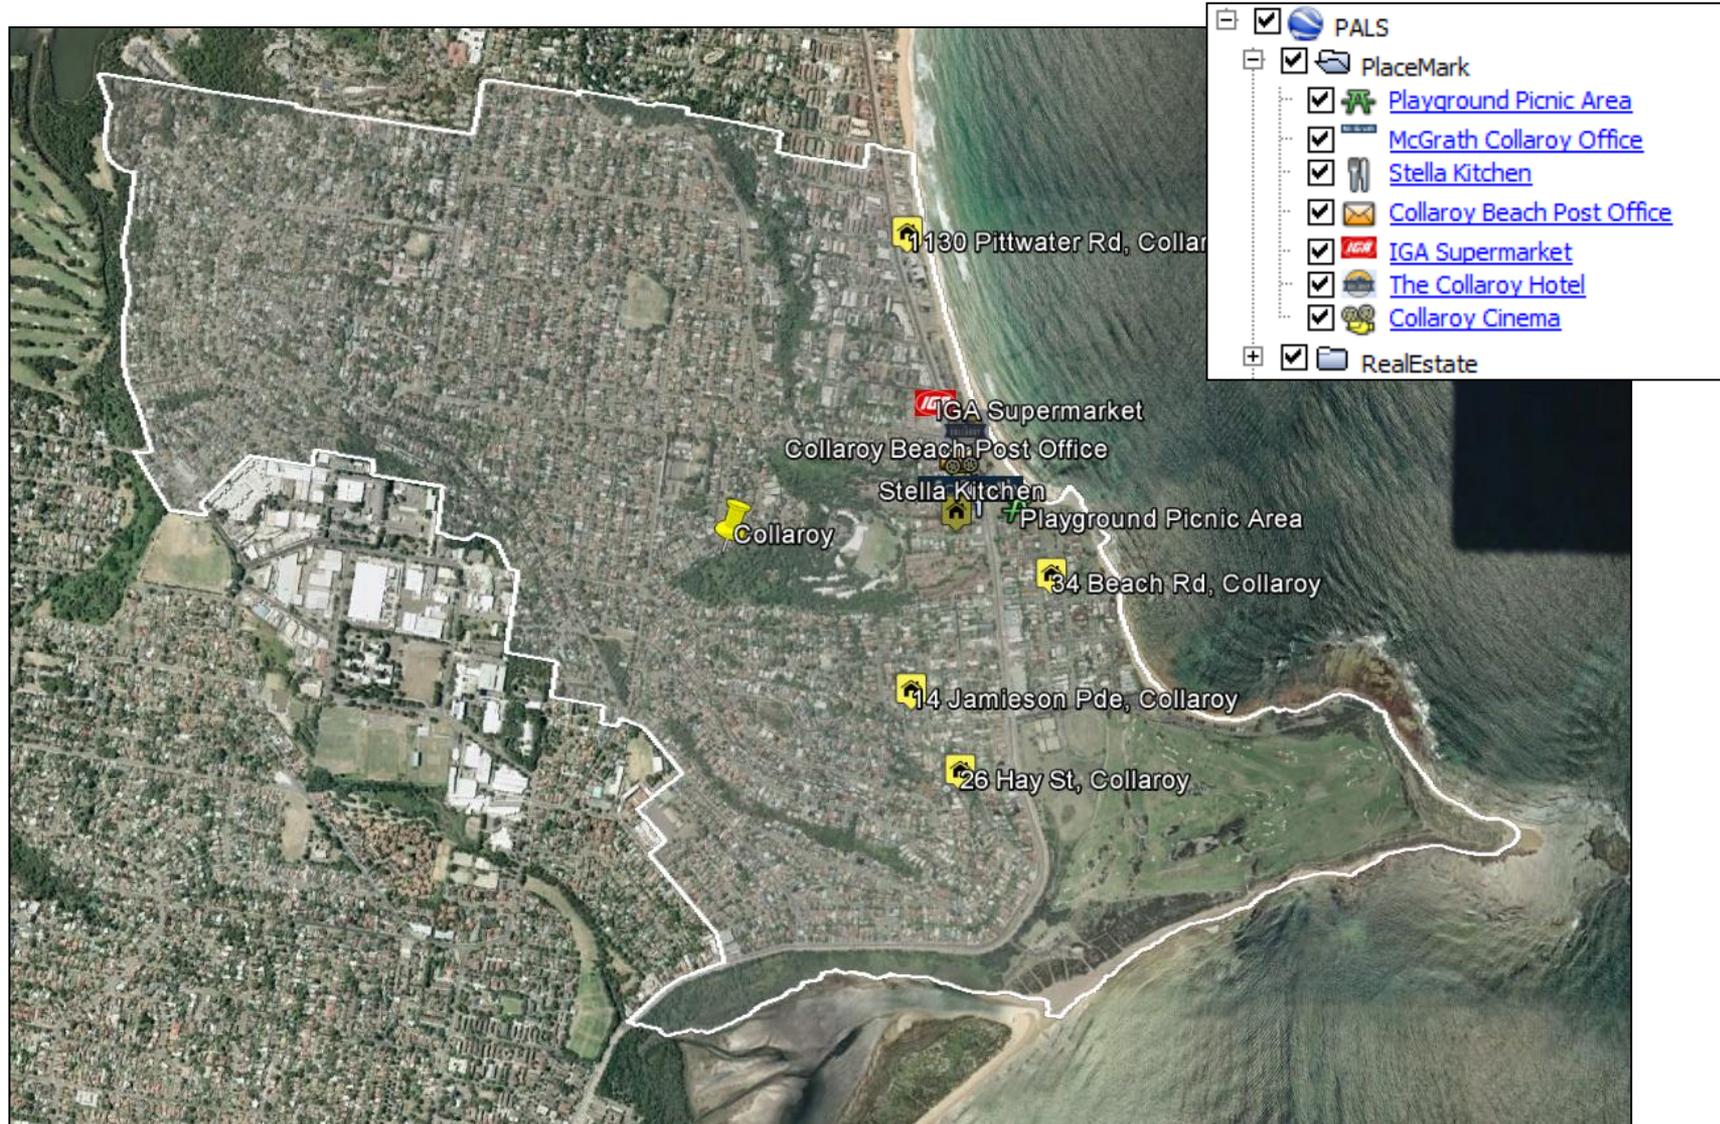

Enter a name for the place mark

Select an appropriate icon for the place mark

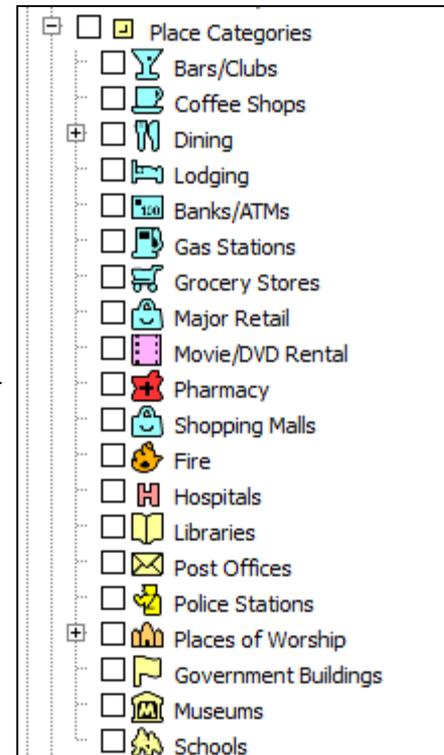

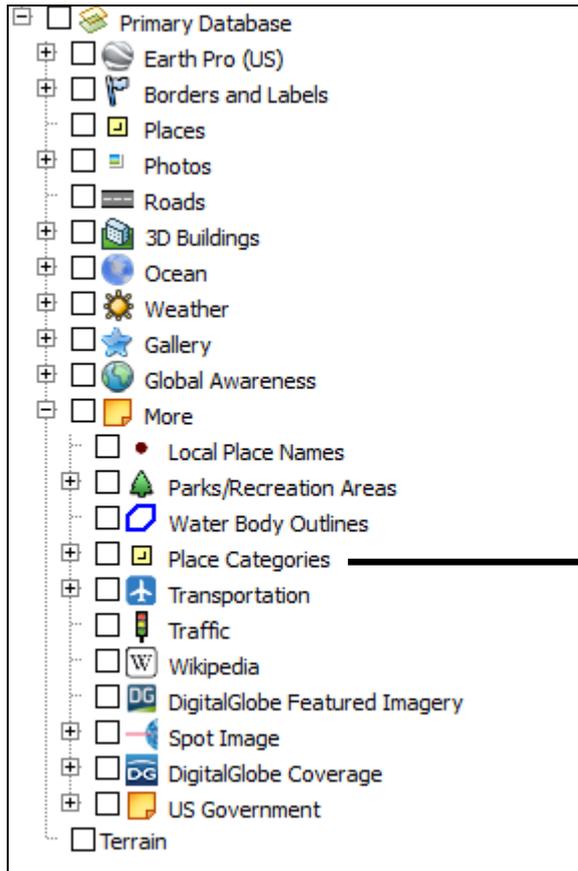

Move the place mark to the correct location

The screenshot shows the Google Earth interface with the 'Icon' dialog box open. The dialog box has a title bar 'Icon' and a URL 'http://maps.google.com/mapfiles/kml/shapes/dining.png'. It features a grid of icons, with a dining fork and knife icon selected. The background is an aerial view of a coastal town with a beach and buildings. Labels 'La Perla Restaurant' and 'Emyrent 1 San Martin' are visible on the map. The dialog box also includes fields for 'Name', 'Latitude', and 'Longitude', and buttons for 'Add Custom Icon...', 'Clear Custom Icons', 'No Icon', 'OK', and 'Cancel'.

These place marks can have different icons and can be stored in a folder that can be saved as a kml/kmz file for sending to clients to highlight their proximity to a property

Google Earth has a number of built in place marks such as the Place Categories which can be turned on or off

Displaying the "Dining" layer place marks will show all of the local eateries which can be clicked to display the description of the eatery.

The image shows a map interface with a sidebar menu on the left. The menu is titled "Place Categories" and includes the following items, all of which are checked:

- Place Categories
- Bars/Clubs
- Coffee Shops
- Dining
 - Dining - Asian
 - Dining - Barbecue
 - Dining - Fast Food
 - Dining - Indian
 - Dining - Italian
 - Dining - Japanese
 - Dining - Mexican
 - Dining - Pizza
 - Dining - Seafood
 - Dining - Steak Houses
 - Dining - Other

The main map area shows an aerial view of a coastal town. A yellow pin is placed on a building labeled "Emyrent 1 San Martin". A white information popup is displayed over the map, containing the following details:

- Restaurante Europa San Sebastián**
- San Martin Kalea, 52, 20007
- Donostia, Gipuzkoa, Spain
- +34 672 02 63 78
- 1 review

The popup also includes a small photograph of the restaurant's exterior, which has a sign that reads "CAFETERIA EUROPA". Below the photo, the text "Restaurante Europa San Sebastián" is repeated. The background map shows a sandy beach on the left, a road, and a dense residential area with buildings.

Other place marks such as Bars/Clubs can be displayed.

The image shows an aerial view of a coastal town with a beach and buildings. A yellow location pin is placed on a building labeled 'Emyrent 1 San Martin'. A white information popup is centered over the pin, displaying the following details:

- La Madame**
- San Bartolome Kalea, 35, Donostia, Gipuzkoa, Spain
- +34 943 44 42 69
- lamadamesansebastian.com
- 4.7 ★★★★★ 6 reviews

The popup also features the restaurant's logo, which is a circular emblem with 'lamadame' in the center, 'RESTAURANT & LOUVE' at the top, and 'Donostia - San Sebastián' at the bottom. Below the logo is a black bar with the text 'La Madame'. A 'Photos' section follows, containing five small thumbnail images of the restaurant's interior and food, each with a small 'La Madame' logo and a link icon. At the bottom of the popup is a link that says 'More photos »'. The background of the popup is white with a close button (X) in the top right corner. The Google Earth interface is visible at the bottom of the image, showing the text 'Google earth' and coordinates: 'Imagery Date: 10/23/2014 lat 43.315258° lon -1.988813° elev 9 m eye alt 585 m'. A scale bar in the bottom left corner indicates '115 m'.

Transportation information is also available.

The image shows an aerial view of a coastal town with a popup window for 'San Martin 57'. The popup lists bus routes: 5, 16, 18, 25, 33, 40, B1, B7, B8, E04, E23, E24, E28, Tolosa - Don..., Andoain - Do..., Asteasu - Do..., Lasarte / Or..., Usurbil - Or..., and G - 2 Andoi... It also includes the website lurraldebus.net and www.dbus.es. A legend on the left shows transportation options: Transportation (checked), Airports, Rail, Subway, Tram, Bus (checked), Waterway, and Mountain Rail.

5	16	18	25	33	40
B1	B7	B8	E04	E23	E24
E28	Tolosa - Don...	Andoain - Do...	Asteasu - Do...	Lasarte / Or...	Usurbil - Or...
G - 2 Andoi...

www.dbus.es

Photos can be added and positioned at the photo location and view
eg. panoramas taken from drones

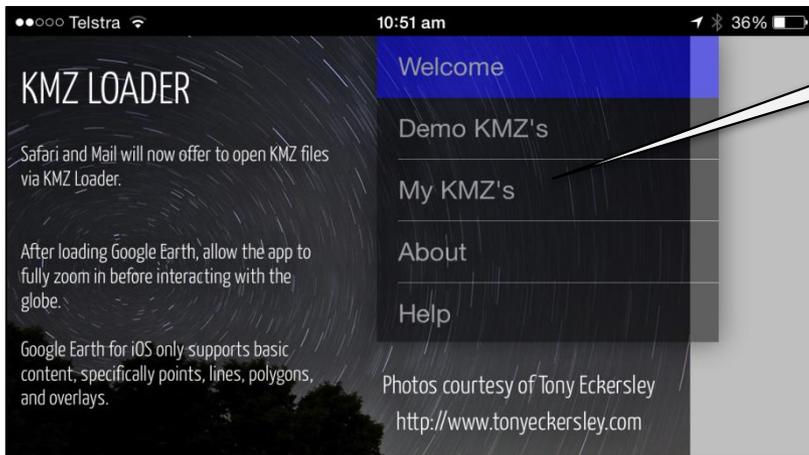

For a client looking at numerous properties, **PlaceMap** is a very useful application for saving the properties of interest for later referral.

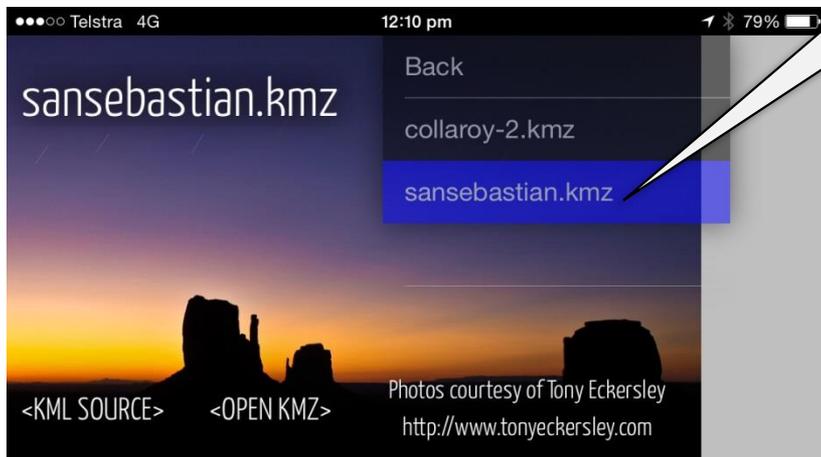

Each property of interest can be emailed to your smart phone and then saved in a free app called KMZ Loader and then easily opened in **Google Earth** on your phone for viewing.

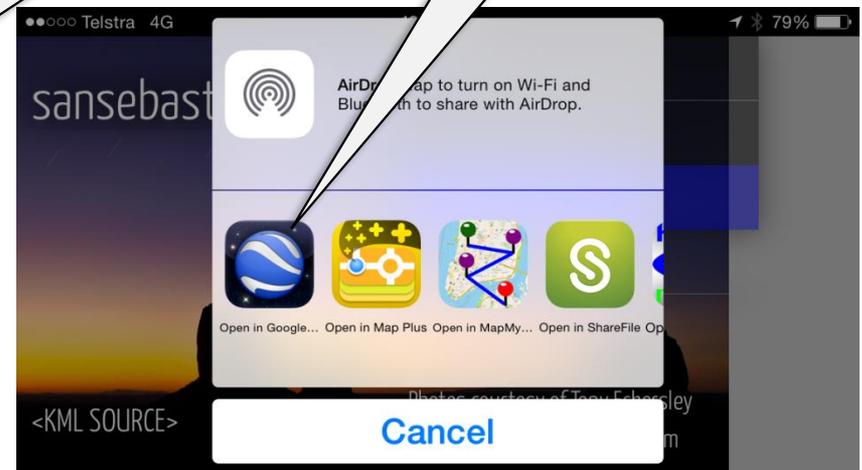

KMZ Loader is a free app that can be used to store KMZ and KML files for later viewing in **Google Earth** or other mapping apps.

KMZ files will be stored in the My KMZ's folder

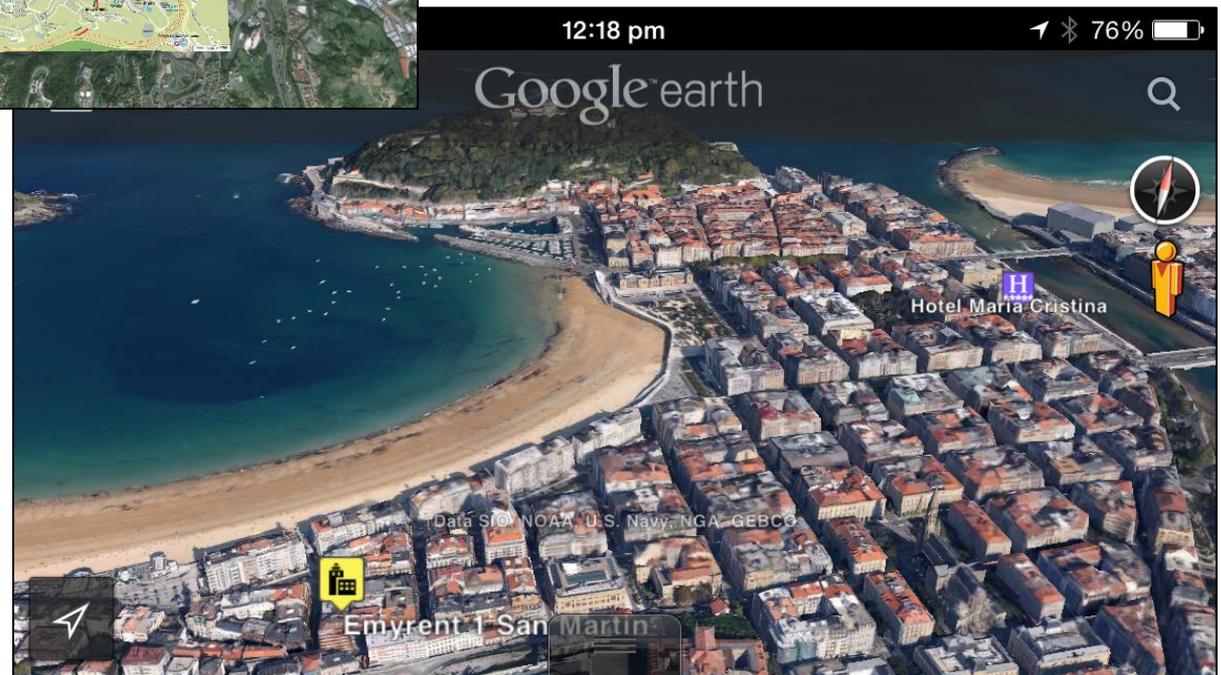

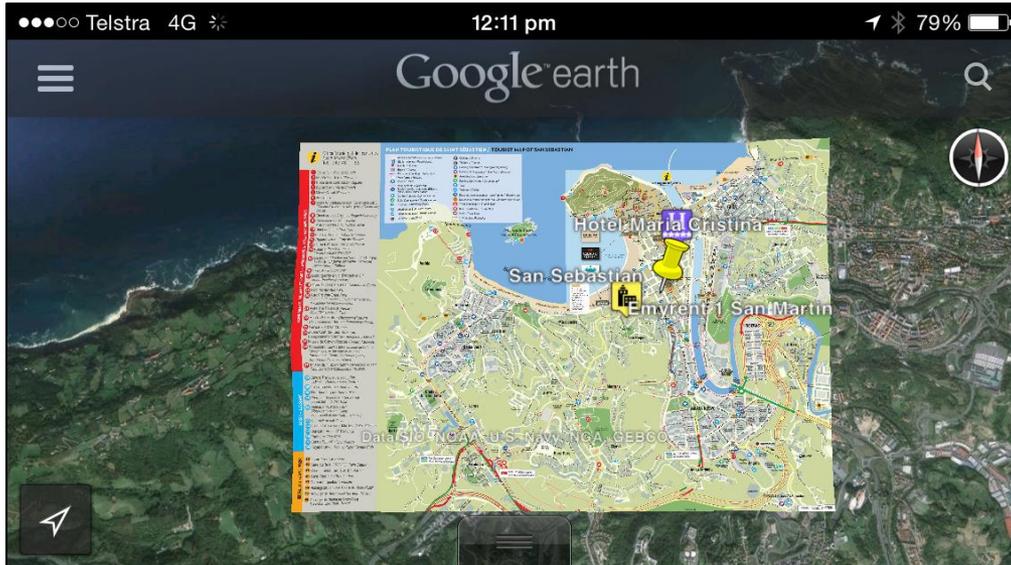

My KMZ's folder with stored property files

Select a file and then tap Open KMZ and then Open in Google Earth

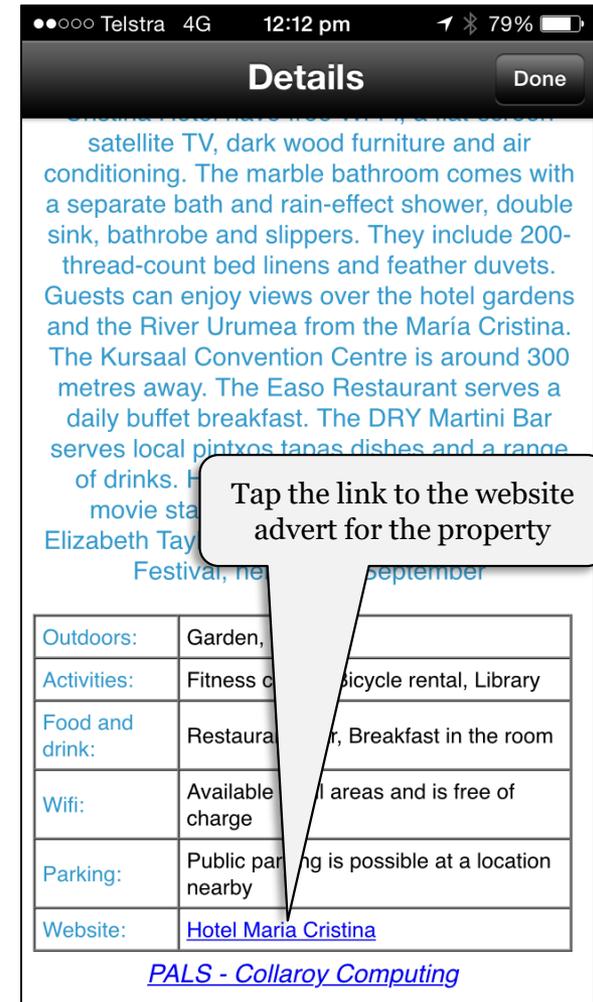

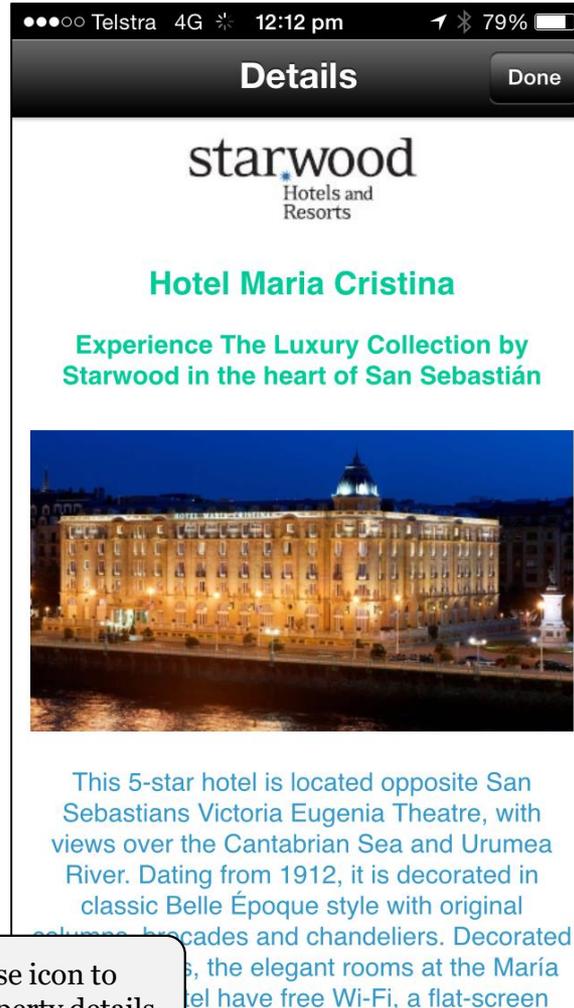

Google Earth will open and display the information stored in the kmz file

The property details will be displayed and you can tap the Website advert to go straight to the agents website for more information about the property

Tap the house icon to display the property details

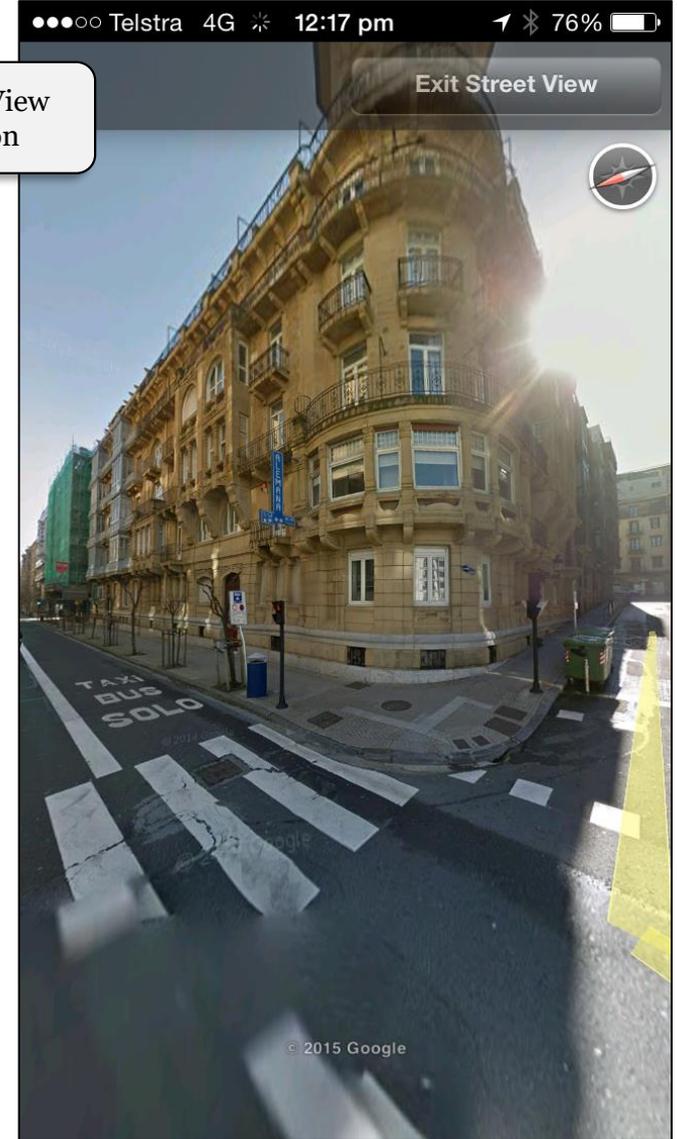

Tap the link to the website advert for the property

You can also initiate Street View by tapping and dragging the icon to the desired location.

Tap and drag the Street View icon to the road location

The **PlaceMap** system for Accommodation comes with 3 detailed tutorials that can be incorporated into a one day on-site training course covering the following topics:

- ❑ Installing & setting up **Google Earth**
- ❑ Navigating & searching
- ❑ Using layers - 3D buildings & terrain
- ❑ Placemarks, lines and areas
- ❑ Image overlays eg. floor plans, tourist maps
- ❑ Creating and viewing tours
- ❑ Measuring and digitizing features
- ❑ Printing high quality maps with title blocks
- ❑ Sharing data to computers & mobile phones
- ❑ Geocoding property data
- ❑ GPS Tracking
- ❑ Using the **PlaceMap** online system

About Us...

GEOWiZ Consulting is a boutique IT consultancy based in Sydney specialising in developing geospatial solutions to various industries.

GEOWiZ Consulting has developed a number of in-house applications and services for the real estate industry including the **PlaceMap** technology.

GEOWiZ Consulting aims to work closely with its client base provide a 360 degree service that generates opportunity and efficiencies at all levels of business, including strategy, marketing and sales with the vision of contributing to generating higher revenues and improved cash flows.
